

Classic[®] Eco-Block with PCS

Made with Recycled Glass

Modern glass bottles take 4,000 years to decompose - even longer when buried in a landfill. For this reason, Rockwood is excited to offer "green" designers and specifiers Eco-Block — the industry's first retaining wall solution manufactured with up to 20% post-consumer recycled glass. Eco-Block is both environmentally friendly and attractive. Its bright, multi-colored glass aggregate gives Eco-Block a look like no other SRW retaining wall.

Classic[®] Eco-Block[®] with PCS

Eco-Block

Unit specifications, availability, color, and fascia options vary by manufacturer. Please contact your nearest Rockwood manufacturer or dealer for more information.

Classic 6 Eco-Block Straight Split

Size: 6" H x 18" W x 12" D

150mm x 450mm x 300mm

Weight: 60 lbs., 27 kg

Recycled glass block products are special order and available in most retaining wall systems. Contact your local manufacturer for availability.

The Advantages of the Classic[®] System...

It's Fast... Located on the underside of each Classic[®] block, the 4" x 2" Anchor Bar creates an automatic setback with the highest shear resistance in the industry. Plus, Classic's fewer pieces, pinless design, and lower weight per square foot reduces construction time, labor costs, and freight charges.

It's Simple... "One Unit" construction is a vital element of Classic's superior design. 90° corners and half blocks are made simply by removing a portion of the block. No special blocks are required; no special inventories are needed; no shortages occur on the jobsite!

It's Strong... Upon assembly, Classic blocks automatically create 4" x 5" vertical "stone columns". When layered with grid, the gravel filled "stone columns" provide a multi-point interlock, for a more uniform block-to-grid connection. Plus, Rockwood's patented PCS[™] (Positive Connection System) gives engineers and builders the option to increase the blocks' geogrid connection capacity, for use in the most critical wall applications.

It's Versatile... Variable setbacks, sharp radius turns, "One Unit" construction, and complete interchangeability are all features of Rockwood's Classic System. The ability to mix various sizes and colors within a wall enhances your imagination without sacrificing structural integrity. Plus, the Anchor Bar allows you to build at any setback you desire – from 0° to 14°, providing the only "true" vertical setback in the industry.
