

# CHROMA SHIELD PROTECTED PAVERS STAND UP TO THE DAMAGING EFFECTS OF TIME AND MOTHER NATURE.

Chroma Shield manufactured pavers are highly resistant to fading and to the harmful effects of salt, chemical and acid rain exposure. Chroma Shield also provides some protection against stains and rust marks.

## WHAT IS CHROMA SHIELD?

The Chroma Shield manufacturing process is a series of chemical reactions between the paver and the Chroma Shield solution. As pavers are demolded, a proprietary aqueous-based solution is sprayed on the surface causing a chemical/molecular reaction that creates the Chroma Shield protective layer. This new protective compound penetrates into the surface of the paver three to five millimeters deep and can only be removed with heavy abrasion/wear.

## CHROMA SHIELD PAVERS ARE:

- Fade Resistant
- Stain Resistant
- Acid Rain Resistant
- Salt Resistant
- Spalling Resistant
- Inhibits Efflo and Poly Haze

*Years later, Chroma Shield pavers remain extremely fade resistant.*
